# The Do's & Don'ts of Web Design

## 1. DO use strong color contrast

A strong color contrast catches the eye and is visually appealing. A web designer should choose a balanced color pallette.

## 1. DON'T use low-contrast colors

Low-contrast color pallettes make your information difficult to read.

## 2. DO use readable fonts and spacing

A website should be very easy to read.

## 1. DON'T overcrowd the page

If a user is overcrowded with info, they'll never know where to go.

## 3. DO keep Navigation Simple

Keeping the design flow simple ensures that your user will use the application as intended.

## 3. DON'T use tiny text

It's hard to read!!!!!

## 4. DO design for different screen sizes

Responsiveness is a must when designing websites in the modern age. Your site should look good on any device.

## 4. DON'T be vague

A strong websits is cohesive and straight to the point.
